PAPER OR CD/CARD

1. Plug in and put disconnect power switch in ON (I) position
2. Press (⏻) ON to activate (blue)
3. Feed paper straight into paper entry and release

100% JAM PROOF

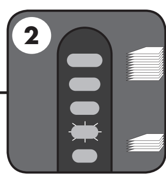

JAM PROOF SYSTEM OPERATION*

Eliminates frustrating jams by preventing overloads and powering through misfed paper.

SET-UP AND TESTING

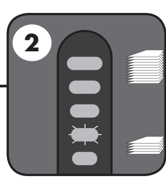

Feed into paper entry and release

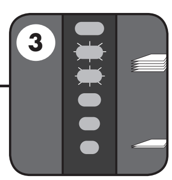

If too many sheets, indicator will light up to red and shredder will not take paper

Remove several sheets until the indicator is below red and the shredder will take the paper

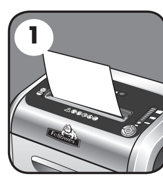

Shredder will take fewer sheets, but if indicator is below yellow, you can add more sheets without fear of jamming

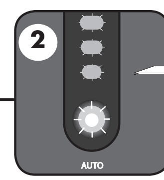

Increase the number of sheets being fed up to the top yellow light to maximize your productivity

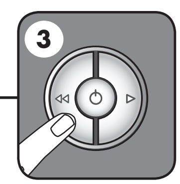

MISFED PAPER

If paper is misfed and stops shredding, all indicator lights will illuminate and shredder will pause for 3-6 seconds

Automatic correcting action will power through the misfed paper, so shredding can continue (do not add more paper during flashing)

If Remove Paper icon (⏏) is illuminated, press reverse and remove paper

If there is too much paper for the shredder to power through, it will reverse the paper out for easy removal

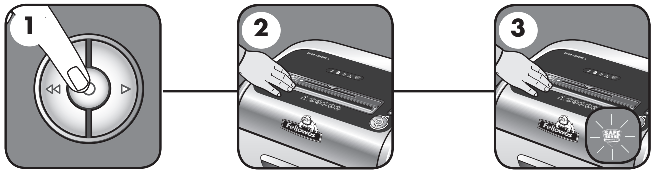

Reduce paper quantity to an acceptable amount and refeed into paper entry

*** 100% Jam Proof when used in accordance with usesr manual**

SAFESENSE® TECHNOLOGY OPERATION

4. Once deactivated, the indicator will flash and the SafeSense® feature will not function
5. To clear paper, press and hold forward (▷) key until paper is shredded
6. Once the paper is cleared, reactivate the SafeSense® feature (To re-engage, see Operations)

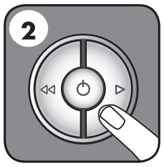

BASIC PRODUCT MAINTENANCE AND TROUBLESHOOTING

OILING SHREDDER

FOLLOW OILING PROCEDURE BELOW AND REPEAT TWICE

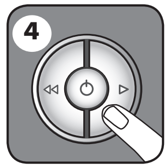

*Apply oil across entry

Press forward

Shred one sheet

Press and hold forward (▷)
2-3 seconds

⚠CAUTION ***Only use a non-aerosol vegetable oil in long nozzle container such as Fellowes 35250***

- All cross-cut shredders require oil for peak performance. If not oiled, a machine may experience diminished sheet capacity, intrusive noise when shredding and could ultimately stop running. To avoid these problems, we recommend you oil your shredder each time you empty your waste bin.

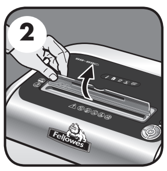

CLEANING AUTO-START INFRARED SENSORS

Paper detection sensors are designed for maintenance free operation. However, on rare occasions the sensors may become blocked by paper dust causing the motor to run even if there is no paper present (Note: two paper detection sensors are located in the center of the paper entry).

TO CLEAN THE SENSORS

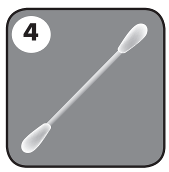

Turn off and unplug shredder

Lift CD flap

Locate Auto-start infared sensor

Dip cotton swab in rubbing alcohol

Using cotton swab, wipe away any contamination from the paper sensors

PREVENTIVE MAINTENANCE AND MISCELLANEOUS TROUBLESHOOTING

- Run shredder once a day in reverse for 15 seconds to clear cutters
- Empty wastebasket when bin full indicator light is illuminated using bag # 36052
- Shredder will not function if the pull-out bin is not pushed all the way in, or if bin needs to be emptied.
- When shredding for a prolonged period of time, the motor can become warm and require a cool down period. When this occurs the overheat indicator will alert you to the problem, this model will require 40 minutes to cool down.
